

CALL FOR PAPERS

IWSM 2008
18th International Workshop
on Software Measurement

MetriKon 2008
DASMA Metrik Kongress

Mensura 2008
International Conference
on Software Process and Product Measurement

November 18-19, 2008, Siemens AG, Munich, Germany

by **DASMA** Deutschsprachige Anwendergruppe für
Software-Metrik und Aufwandschätzung
GI FG 2.1.10 German Interest Group on Software Metrics
In cooperation with: Canadian Interest Group on Metrics
COMmon Software Measurement International Consortium
Metrics Associations International Network
University of Magdeburg, Germany,
École de Technologie Supérieure – Université du Québec, Canada,
University of Alcalá, Madrid, Spain
Supported by **Siemens AG**, Munich, Germany

THEME & SCOPE

Software measurement and metrics are key technologies to manage and to control software development projects. Measurement is essential of any engineering activity, by increasing the scientific and technical knowledge for both the practice of software development and for empirical research in software technology. This conference facilitates the exchange of software measurement experiences between theory and practice.

TOPICS OF INTEREST

We encourage submissions in any field of software measurement, including, but not limited to

Software metrics foundations	Metrics for integration and testing
Practical measurement application	Measurement databases
Measurement processes and resources	Metrics validation
Empirical case studies	Measurement services
Measurement acceptance	Measurement tools
Functional size measurement	Measurement experience and guidance
Software estimation	Theory of measurement
Software process improvement	Measurement paradigms
Metrics for specific areas, e.g. for web services	Enterprise embedded solutions
Metrics for system engineering	Software benchmarking

PAPER SUBMISSIONS

Authors should send proposed *short papers* (2 to 4 pages) by e-mail by **June 9, 2008** to
metrikonpapers@dasma.org

Contributions from industrial practice or practice-focused research are requested. Papers should not have already been published elsewhere. Nor should they have been submitted to a journal or to another conference. The program committee decides on paper acceptance according to a defined review procedure. At least one among the authors of each accepted paper should register for the conference and ensure paper presentation.

The final version of each paper has to comply with the 'IWSM/MetriKon 2008 Author Guidelines'.

Conference languages are English and German. German papers will be presented in a separate track.

TUTORIAL AND WORKSHOP SUBMISSIONS

Proposals for half-day or full-day tutorials or workshops to be held on November 17, 2008 should be submitted until August 4, 2008.

EXHIBITION

Applications for an exhibition booth should be submitted until August 04, 2008. The exhibition will be offered in parallel to the conference and should relate to the conference topics. For further information please contact the DASMA office.

CONFERENCE TIMETABLE

Paper Submission deadline:	June 9, 2008
Notification of acceptance:	August 04, 2008
Final paper deadline:	September 22, 2008
Tutorials / workshops:	November 17, 2008
Conference date:	November 18-19, 2008

PROGRAM COMMITTEE

Alain Abran, École de Technologie Supérieure, Montréal, Canada	Peter Liggesmeyer, Fraunhofer IESE, Kaiserslautern, Germany
Günter Büren, Büren & Partner, Nuremberg, Germany	Mathias Lothar, Robert Bosch GmbH, Stuttgart, Germany
Luigi Buglione, Engineering.IT, Italy / ÉTS, Canada	Fernando Machado-Píriz, University Católica de Uruguay, Uruguay
Manfred Bundschuh, DASMA, Germany	Roberto Meli, DPO, Rom, Italy
François Coallier, École de Technologie Supérieure, Montréal, Canada	Dirk Meyerhoff, Schüco-Service GmbH, Bielefeld, Germany
Ton Dekkers, Galorath International Limited, UK	Jürgen Münch, Fraunhofer IESE, Kaiserslautern, Germany
Jean-Marc Desharnais, École de Technologie Supérieure, Montréal, Canada	Olga Ormandijeva, Concordia University, Canada
Javier Dolado, Universidad San Sebastian, Spain	Frances Paulisch, Siemens AG, Munich, Germany
Axel Dold, Daimler AG, Sindelfingen, Germany	Ricardo J. Rejas-Muslera, University Francisco de Vitoria, Spain
Reiner Dumke, University of Magdeburg, Germany	Salvador Sánchez-Alonso, University of Alcalá, Spain
Christof Ebert, Vector Consulting, Stuttgart, Germany	Andreas Schmietendorf, Berlin School of Economics, Germany
Bernd Gebhard, BMW, Munich, Germany	Harry Sneed, SES Munich/Budapest, Germany/Hungary
Marcela Genero, University of Castilla-La Mancha, Spain	Charles Symons, Software Measurement Service Ltd, Edenbridge, UK
Naji Habra, FUNDP, Namur, Belgium	Hannu Toivonen, Nokia Siemens Networks, Finland
Nadine Hanebutte, University of Idaho, USA	Cornelius Wille, FH Bingen, Germany
Hans-Georg Hopf, GSO-Hochschule, Nuremberg, Germany	Loreto Zornoza, IBM, Spain
Claus Lewerentz, Technical University Cottbus, Germany	Horst Zuse, Technical University of Berlin, Germany
Marek Leszak, Alcatel-Lucent, Nuremberg, Germany
